Dual or triple glazing

Tested to AAMA 501.8 (2,000 ft-lbs).

Available with Retrofit Solution Insert

Flush hardware and sash

Swinging Test Weight (300-lb. weight) simulates impact of 250-lb. man.

Winco recognizes natural light promotes a healing environment for hospitals and mental health institutions. Our psychiatric windows are engineered to be robust and secure behind a non-institutional framing system with protective glazing that delivers natural daylight with the security and protection required for psychiatric care facilities.

Our psychiatric windows resist or minimize:

- Attacks from patients wielding blunt or sharp objects
- Attacks from intruders
- Exposure to flame and heat
- Exposure to chemicals and bodily fluids
- Abrasion of glazing (polycarbonate protective)
- Prying or cutting of frame materials

Adjustable, integral 2" blind option shown.
