

Preserving Historic Buildings One Window at a Time

With the newest rendition of our Historic Steel Replica Windows, we've figured out a better way to respond to Mother Nature. Our latest version of the 3250 Series Steel Replica Windows is capable of withstanding up to 200 mph hurricane winds. This new series of Steel Replica Windows like all Winco Windows are hurricane-impact tested to meet a variety of standards:

- AAMA (American Architectural Manufacturers Association) Certification
- TAS Impact E Missile (9# 2x4 @ 100psf)
- TAS Impact D Missile (9# 2x4 @ 80psf)
- ASTM E1886/E1996
- DOD blast-testing

This means Winco Steel Replica Windows are TDI (Texas Department of Insurance) Certified and AW rated performance with 12# water resistance, making them the ideal choice for historic buildings near coastal waters anywhere in the U.S.

If you have an historic project on the boards, contact a Winco rep to help you get the look and feel of old with the strength and performance of new.
