

Dominion Apartments

Arlington, VA

Replicating History

Winco's steel replica windows match originals with all the details

Designed and constructed in 1955, the Dominion Apartments in Arlington, Virginia, provides centrally located living to the DC area's largest employers, historical sites, and distinctive shopping and dining. All of the original steel windows in the 188-unit multi-family residential apartments, as well as the ground-level retail shops have been replaced with Winco's 3250 Steel Replica window series. The new windows match the style and profile of the originals with better energy-efficient performance. The large window opening feature a unique window placement configuration with dove grey and black Kynar paint trim for a sophisticated look.
